JDS1 MARKETING

YOUR HIGH-PERFORMANCE WEBSITE

What you get from us, in plain English.

✓ You own it

Your domain, your content and your site's code belong to you. Not to us, and not to a builder.

✓ We build it

Design, words, SEO and launch. Our team does the work, and you approve it.

✓ Yours to take with you

If you ever want to leave, we hand it all over. Nothing is locked in.

WHAT MAKES IT DIFFERENT

	MOST WEBSITES	⭐ JDS1 HIGH-PERFORMANCE
Speed	Pages are put together each time someone visits, and slow down as add-ons pile up.	Pages are built ahead of time, so they show up fast, even on a phone.
Add-ons	A stack of plugins from different companies, each one needing updates.	No plugins. Features are built right into the site.
Design	A template that thousands of other businesses also use.	Designed from scratch for your business.
Making changes	Changes often go live the second someone clicks Save.	Every change gets a private preview, then a person approves it.
Google and AI	SEO is added later, if at all.	Built in from day one, so Google and AI tools understand what you do.
Who you call	The host, the developer, the plugin company...	One team: us.

For your tech person: custom-built with Next.js and React, hosted on Vercel, with the code and content kept in GitHub. The same tools big brands use.
